Dear Friends & Fellow Beef Producers,

Welcome to the 17th Annual BJ Angus Genetics Spring Production Sale. We hope this finds you and your family well and you are ready to begin thinking about breeding cows in 2018. Most industry analyst agree 2018 shows much promise. The herd expansion experienced the past few years has leveled, which is comforting for beef producers using conventional marketing options. The marketing options for producers investing in value-added genetics, the future is quite bullish. BJ Angus Genetics wants to be your partner to meet the future demands and rewards of the beef industry.

The bull offering consists of over 90 heifer bulls and many sets of full brothers. We have used many tools to identify the outliers (pedigrees, EPDs, AHIR data, phenotypic data, cow family history, & DNA) to offer you “honest cattle” for your consideration. What the numbers can't show you is our constant dedication to selecting for good feet and legs, quiet disposition, awesome phenotype, and fertility.

The female offering is young, productive, phenotypically awesome, and bred to produce progeny that will hit all the targets from birth to the dinner plate efficiently. From the donor cows with time-tested performance and top of the breed rankings to the bred and open heifers with breed leading EPDs to the fall pairs with an awesome set of calves at side to the young productive bred cows, **we are proud to offer you our very best!**

Please visit our web site often, www.bjangus.com to view videos of (available by March 1) and updated information about the sale offering. If you have any questions please don't hesitate to call or stop by the ranch. **Buy with confidence, we stand behind what we sell.**

We hope you will join us March 8. If you are unable to attend, please feel free to go to www.LiveAuctions.tv and bid online. The online process works well for folks who can't attend the sale.

Thank you for your interest in BJ Angus Genetics. Please let us know how we can assist you.

John and Bonnie Slocombe

Watch the sale and bid live online.

Real-time bidding is available via the internet for this sale. Live audio and video will allow buyers to bid on animals just as if they were present at the sale. Buyers must create an account two days prior to the sale. Please visit www.LiveAuctions.tv to create an account and request a buyer number. Instructions are available on the website to walk you through the account set-up process. Contact Brad Fahrmeier (816) 392-9241 • email: brad@liveauctions.tv.

ADDITIONAL SALE INFORMATION:

LIABILITY: All persons attending the sale do so at their own risk. The owners, hosts, and sales staff assume no liability, legal or otherwise, for injury, loss or damages.

OUTSTANDING BREEDING GUARANTEE: Our comprehensive breeding guarantee assures buyers that all breeding cattle sold are fertile to the best of our knowledge. (See page 17).

HERD HEALTH: All cattle will be accompanied by proper health certificates for immediate shipment. Further information is provided on Page 2.

INSPECTION OF CATTLE: The cattle will be available for inspection at any time prior to the sale at BJ Angus Genetics. Please call ahead.

TERMS AND CONDITIONS: Cattle will sell under the suggested Terms & Conditions of the American Angus Association (www.angus.org/Pub/suggested_sale_terms.pdf)

SIGHT UNSEEN PURCHASES: If you can't make it to the sale we will do our best to represent the cattle to you. Please call at least 72 hrs. ahead of the sale, if possible, to go over your needs. This gives us time to determine the best possible bulls/females for your operation and get back with you to discuss them. You may leave bids with us if desired, we will buy the

cattle as cheap as we can, or you may call any representative you desire. Our program is built on trust and honesty.

SUPPLEMENTAL INFORMATION: A supplement sheet will be available sale day with complete and up-to-date breeding and ultrasound information. This information will also be posted on our website, www.bjangus.com. Announcements from the auction block regarding the cattle selling take precedence over the information listed in this sale book or the sale supplement.

SETTLEMENT: Cattle purchases are to be settled on sale day prior to load out. Terms of the sale are cash or check, unless satisfactory arrangements are made prior to sale day.

SALE LOCATION: See map on back cover

DELIVERY: All bulls will be delivered free of charge in Kansas and surrounding states. Bulls selling for over \$4,000 outside of Kansas and surrounding states will be delivered to central points. If you pick up your cattle purchases on sale day, we will deduct \$50 from the purchase price of each lot or group.

Go to www.bjangus.com to view photos, videos, and updated information of the sale offering!

❧ The Bulls That Sell ❧

The bulls that sell in our sale represent the product of a total A.I. breeding program to provide BJ Angus customers with the most predictable cattle possible. Using high-accuracy A.I. sires is the only way to produce this type of bull. We believe the best way for our customers to insure predictability is to use sons of progeny proven sires.

Embryo transfer (ET) is a technology that allows us to capitalize on the genetics of our very best cows. ET allows us to breed the best bulls of the Angus breed to the top 10% of the cows at BJ Angus Genetics. These matings create the most desirable and predictable cattle we can produce.

BULL DEVELOPMENT: WEANING TO YEARLING DEVELOPMENT

The bulls were fed at the Kansas Bull Development Center near Onaga, Kan., for 120 days on a high-forage diet designed for 3.00 lbs gain/day. At 365 days of age, the bulls were ultrasound scanned by Casey Worrell, a CUP Certified Ultrasound Technician from Texas, to quantify intramuscular fat. The CUP laboratory in Ames, Iowa, forwarded the processed

scan data to the American Angus Association where it was used to formulate carcass ratios, EPDs, and \$Value Indexes for each bull.

BULL DEVELOPMENT: YEARLING TO 18 MONTHS OF AGE

Since October 15, the fall bulls have been running in a 150 acre Flint Hills pasture. They were fed a grower diet, grazed native Flint Hills grasses and walked through the pasture daily for fresh water (1/2 mile). Pasture conditioning the bulls for six months develops tough feet, legs, and joints which increases longevity, and enhances fertility. Dr. Karl Lukert, DVM, performed a breeding soundness examination (BSE) on each bull within 30 days of the sale. The BSE included evaluating semen motility and morphology and a thorough physical examination. Dr. Lee Penner, DVM, tells it best, "These bulls are well conditioned athletes, "rock hard" and ready to go to work."

BJ ANGUS GENETICS VACCINATION PROGRAM

COWS • 30 DAYS PRIOR TO SYNCHRONIZATION

- Bovi Shield Gold FP5 VL5 HB (Zoetis)
- Dectomax Pour-On (Zoetis)
- Multimin

CALVES • TWO MONTHS OF AGE

- Alpha 7 MB1 (Boehringer)
- Inforce 3 (Zoetis)
- One Shot (Zoetis)

Heifer bull. Rarely is a herd sire prospect produced that possesses a flawless set of premium EPDs and \$Value indices, exceptional individual performance data in a large contemporary group, and absolutely stunning phenotype. New Dimension is a long-spine, deep bodied, heavily muscled individual with massive volume, excellent structure, and may be one of the stoutest Discovery sons out there today. This easy going, easy doing rascal stems from one of the famous cow families at Gardiner Angus Ranch as his

dam is the granddam of the highly proven Method bull in the Select Sires lineup. New Dimension posts a BW of 65 lbs, WW of 817 lbs, YW of 1406 lbs, IMF ratio of 113 and RE ratio of 105 and ranks in the top 1% of the breed for YW, RADG, MW, RE, \$F, \$G, \$YG and \$B; 2% for WW, CW, and \$QG; and 3% for Marbling. This 6 frame herd sire prospect should produce light birth weight calves that grow fast producing excellent weaning and yearling weights that hit all the economically important targets on the grid.

Heifer bull. Brother to Lots 16, 33, 34, 56 & 60. This stunning son of 100X is out of one of the very best Complete daughters to grace the Angus breed, 1071 who is a donor at Potter Angus Ranch, KS and the dam of the Lot 1 bull in our 2017 sale. Summation is long-spined with excellent feet and bone structure, has individual ratios of 92 for BW, 104 for WW, 109 for YW, and 106 for IMF and RE and ranks in the top 1% of the breed for \$B, 2% for CEM, CW, \$W, and \$F, 3% for YW, RADG, and Milk and 4% for RE. This herd sire prospect should produce light birth weight calves, add pounds to your calf crop and make high production females.

of our 2018 sale offering.

SEMEN INTEREST

We have retained a one-third semen interest in every bull since 2002. Because it generally takes several years for a sire to be "discovered", we feel we can help our customers through programs, find and market bulls that rise to the top. You will own full possession and 100% salvage value of the bull. We are retaining the right to one-third the semen sales revenue from the bull if sometime in the future semen sales become possible. If for some reason you sell the bull to another breeder, BJ Angus Genetics still retains that one-third semen interest. If you purchase a partnership bull and wish to have semen collected for your own herd use, that semen is 100% yours, unless you contact BJ Angus Genetics and we agree to have him collected in a joint venture. If the bull is collected in a joint venture we split the semen production costs and the revenue of sales on a one-third / two-thirds basis. However, if you are not interested in collecting semen on the bull, BJ Angus Genetics will have the right to collect the bull for their own use and will pay expenses for collection(s). We will have him collected at your convenience.

Powerful Waylon son with top 2% Marbling & \$QG, 4% \$G and 20% \$B.

74

BJ Traction 6273

Table with columns: Birth Date: 11/26/16, Bull, 18887303, Tattoo: 6273. Includes sire information and performance metrics.

Summary table with columns: EPDs CED, BW, WW, YW, SC, DOC, Milk. Values: -1/95%, +3.3/90%, +61/20%, +100/30%, +1.51/10%, +9/75%, +31/10%.

Big RE herd sire by Traction that ranks in the top 3% for RE, 4% for \$YG, 10% for \$W & \$B and 15% for CW.

BJ Angus Genetics Breeding Guarantee

We guarantee that all breeding cattle sold by BJ Angus Genetics are fertile to the best of our knowledge. If at any time during the first breeding season following the sale a bull is injured so as to make them functionally infertile, we will provide you with a satisfactory replacement (if available), or issue you a credit equal to the bull's purchase price minus the salvage value received for that bull.

in any future BJ Angus Genetics sale. This guarantee is in addition to the Terms and Conditions of the American Angus Association, which also apply. This is not a life insurance policy. We will not replace or give credit for a dead or incapacitated animal resulting from negligence.

Heifer bull. Lots of growth, power, and performance in this herd sire prospect. Rampage sons are known for adding pounds to a calf crop.

Yearling Bull Management—Caring For Your Bulls

When you get your performance-tested bull(s) home, observing these management practices will result in the best reproductive performance.

FEEDING: Remember, the bull is a yearling or long yearling and still has some growing to do. Feed the young bull well. Hay and grain plus a protein supplement will be adequate. You should feed five to ten pounds of grain and one to two pounds of protein supplement in addition to a full feed of good quality hay from now until the start of breeding season. Continue to feed liberally so the bull will grow out well.

BREEDING SEASON: Plan to use the new bull in a restricted, 45- to 60-day breeding season the first time. Observe him closely to be sure he is serving and settling females.

NUMBER OF COWS: The yearling bull should be used on a minimal number of cows or heifers. The number should be governed by his age at the start of the

breeding season. The following is a guide.

Bull's Age	Number of Females
12 to 15 mos.	10 to 12
15 to 18 mos.	12 to 18
18 to 24 mos.	18 to 25
24 mos. & over	25 to 35

MANAGEMENT & HOUSING: The bull should be kept in a well-fenced lot prior to and following breeding season. A shed or other natural windbreak should be provided. Supply plenty of clean water and minerals free-choice. Treat routinely for lice and grub worms. Run bulls together with caution. Bulls of similar age which have bred cows together will usually work. Check for any unsoundness which might develop. Test annually for Brucellosis and Leptospirosis. Vaccinate for IBR, P13, BVD and Lepto.

—Adopted from the 1999 Oklahoma BEEF, Inc., sale book

GARDINER

December 30, 2017

Dear John & Bonnie,

Congratulations on your 17th upcoming production sale!

This takes a tremendous amount of dedication, focus, study but most of all *effort!* Often, we hear about how constant change is and how constant evolution is the new “*normal*”.

I believe the only “*normal*” is a setting on a dryer. Yet, we do know that markets, weather, economics, *LIFE* moves on. Cattle that have been designed with discipline using the time-tested method of predictable genetics will always offer the best genetic hedge due to their ability to add value!

I would suggest to your current & past customers that they have learned the important things they receive from BJ Angus: Breed leading Angus genetics, cattle that are fully guaranteed. Your patrons know if they have a problem, John and Bonnie will take care of it. Finally, you both have worked very hard at providing marketing support to your customers when they offer their calves for sale with the needed communication you provide to order buyers looking for some of the best Angus commercial cattle in existence.

Today, I hear many opinions from folks that frankly have “no skin in the game”! Seventeen years of dedication to the purpose of adding value to your customers bottom line is a true example of your investment in your clientele bottom line. There’s lots of “chatter” from seedstock operations about all they are and want you to think they are. *I know this, BJ Angus is a long term player in the business of beef, providing genetic excellence, guaranteed customer satisfaction, with the ability to communicate value of customers’ calves to the industry. John and Bonnie congratulations to you both for your long term commitment to your customers!*

Respectfully,

Mark R. Gardiner

This elite Sunrise donor has the largest \$B and RE EPD of all females in this sale offering. She ranks # 6 for RE, #8 for \$B and #9 for \$F among females sired by GAR Sunrise. She is a full sister to the top selling open heifer of the 2016 PDF Sale and her donor dam is a flush sister to the \$425,000 Deer Valley donor, GAR Progress 830. In the 2014 PDF Sale, Progress 370 flushes were the \$20,000 selection of Grand Bayou and the \$13,500 selection of Cox Ranch. She ranks in the top 1% for ten indexes—YW, RADG, CW, Marbling, RE, Fat, \$F, \$G, \$YG & \$B and top 2% for WW, RADG & \$QG. **Selling 1/2 interest with no possession and is open and ready to flush.**

American Angus Association Genomic Enhanced EPDs

Genomic, or DNA, test results are used to enhance predictability of current selection tools, to achieve more accuracy on EPDs for younger animals, and to characterize genetics for traits that are difficult or expensive to measure, such as feed efficiency, carcass traits in breeding stock or maternal traits in bulls. With the investment in genomic technology, animals who are previously placed into single animal contemporary groups benefit by receiving GE-EPD rather than interim-EPD calculations increasing the value of individual predictions.

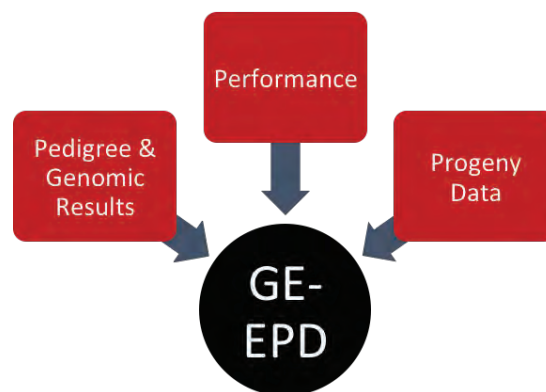

Figure 1. Information contributing to the GE-EPD.

Genomic-enhanced EPD (GE-EPD) are important because they utilize genomic test results in addition to pedigree, performance and progeny data for increased reliability of an animal’s EPD (Fig. 1). Depending on the trait, GE-EPD on unproven bulls have the same amount of accuracy as if they had already sired 8-33 calves. If genomic results are received by Friday on any given week, EPD changes will be seen the following Friday’s weekly genetic evaluation.

Genomic impact on the EPD

In the American Angus Association weekly genetic evaluation, the genomic results are incorporated into the evaluation using a single step method to calculate EPDs. Incorporating genomic results in this way helps to better define the genetic relationship among animals. With the traditional pedigree based approach (EPDs predictions without genomics), the relationships between animals is determined by pedigree alone. Pedigree would dictate all full-sibs, for example, would have a genetic relationship to one another of 0.5, and the relationship between grand-parent and grand-progeny would be 0.25. Because of the way DNA is inherited (passed down), differences in these relationships are present. The animal’s genotype will allow us to determine, for example, which flush-mates, or siblings, are more *genetically* related. In fact, genomic testing allows all pedigree relationships be better defined.

These relationships are quantified using SNP data (genomic results) known as an animal’s genomic relationship. For example, if a newly tested animal shows to have a strong genomic relationship to an animal who is proven to excel for a trait like Marbling, than the newly-tested animal will increase for Marbling EPD. On the contrary, if an animal it found to be more related to a low performing animals in the pedigree its EPDs will adjust accordingly.

Animals more closely related to ancestors with large amounts of actual performance data (weaning, weights, yearling weight, carcass data, etc.) and genomic results recorded

Table 1. Progeny equivalents (PE) – Carcass trait PE equate to actual carcass harvest data not ultrasound scan equivalents.

Trait	PE	Trait	PE
Calving Ease Direct	28	Heifer Pregnancy	14
Birth Weight	21	Milk	33
Weaning Weight	26	Mature Weight	11
Yearling Weight	21	Mature Height	8
Dry Matter Intake	8	Carcass Weight	9
Yearling Height	11	Carcass Marbling	9
Scrotal Circumference	13	Carcass Ribeye	12
Docity	10	Carcass Fat	10

will experience a greater benefit from genomic testing than those with less data recorded in the Association's database.

Importance of phenotypic performance data

Genomic testing is one more tool for breeders to use to more accurately predict the future performance of animals as parents in the population, but this is not a replacement to performance data recording. Breeders sometimes ask if it is no longer necessary to collect weights and measures (e.g. weaning weights, scan/carcass data, and heifer breeding records). On the contrary, phenotypic measures continue to be an important part in further development of improved genomic panels and the refinement of this technology over time.

Percent ranks provided with genomic results

Percent ranks (1-100) are provided by the American Angus Association to assist in establishing direction of interest for each trait, as illustrated in Table 2. If you are making selection decisions for traits that have an EPD provided by the Association, then the EPDs should be considered the selection tool of choice. The EPD and accuracy account for all sources of information available on the animal of interest (e.g., pedigree, own record, weights/measures, genomic results). Using EPD and genomic percentile ranks separately leads to double counting information and will lessen selection efficiency. With that, the EPD provides the most accurate and up-to-date information as it is updated every week; whereas, genomic percent ranks only update once a year and are a by-product of the system.

Table 2. Establishing direction of percent ranks.

Trait	Percentile Rank	Observation
Calving Ease Direct	1%	More unassisted
Calving Ease Maternal	1%	More unassisted
Birth Weight	1%	Lighter
Weaning Weight	1%	Heavier
Yearling Weight	1%	Heavier
Milk	1%	More maternal milk
Yearling Height	1%	More hip height
Mature Weight	1%	Larger cow weight
Mature Height	1%	More cow height
Dry Matter Intake	1%	Eat less
Docility	1%	More docile
Heifer Pregnancy	1%	Increased pregnancy probability
Scrotal	1%	Larger size
Carcass Marbling	1%	Greater
Carcass Ribeye	1%	Larger
Carcass Fat	1%	Leaner
Carcass Weight	1%	Heavier
Tenderness	1%	More tender

Conclusion

Genomic-enhanced EPDs are the best estimate of an animal's genetic value as a parent combining all available sources of information. Genomics permit higher prediction accuracies for younger animals and characterizes genetics for traits where it's difficult to measure the phenotype. To learn more about available genomic tests and place an order, go to <http://www.angus.org/AGI/default.aspx>.
